Syntactic Structures is an influential work in linguistics by American linguist Noam Chomsky, originally published in 1957. It is an elaboration of his teacher's, Zellig Harris's, model of transformational generative grammar. A short monograph of about a hundred pages, Chomsky's presentation is recognized as one of the most significant studies of the 20th century.

History and background. Structuralism is an ambiguous term that refers to different schools of thought in different contexts. As such, the movement in humanities and social sciences called structuralism relates to sociology. Emile Durkheim based his sociological concept on 'structure' and 'function', and from his work emerged the sociological approach of structural functionalism.

Bernard Williams (1929–2003) was a leading influence in philosophical ethics in the latter half of the twentieth century. He rejected the codification of ethics into moral theories that views such as Kantianism and (above all) utilitarianism see as essential to philosophical thinking about ethics, arguing that our ethical life is too untidy to be captured by any systematic moral theory.

1. The Laozi Story. The Shiji (Records of the Historian) by the Han dynasty (206 B.C.E.–220 C.E.) court scribe and historian Sima Qian (ca. 145–86 B.C.E.) offers a “biography” of Laozi. Its reliability has been questioned, but it provides a point of departure for reconstructing the Laozi story. Laozi was a native of Chu, according to the Shiji, a southern state in the Zhou dynasty (see ...
